

MANNOL Motor Kaltreiniger 9671

MANNOL Motor Kaltreiniger is an effective cleaning agent for the engine compartment that removes soiling, oil and burnt technical fluids. It has increased dissolving and washing-active properties. It can also be used for cleaning chassis, aggregates, oil filters, pumps, tools, motorcycles, chains, ship engines, tractors, mowers etc. The highly viscous concentration enables the components to remain on vertical surfaces, thus simultaneously providing the best cleaning effect. It prevents rubber and plastic engine separate parts from oxidising by aggressive soiling as well as prevents electric bonds from oxidising. This product does not harm lacquer, chrome, iron or aluminium surfaces.

Spray the parts to be cleaned from about 20-30 cm and leave to act for approx. 10-20 minutes depending on the degree of contamination. After this, wash off thoroughly with a narrow jet of water.
