

MANNOL Super Benzin 9989

Super Benzin Oktan Plus

Special gasoline fuel additive that improves octane number and engine performance. With lower-grade fuels octane number can be increased by 2-5 points (depending on the original fuel grade). Effectively cleans the entire fuel systems, including injection nozzles and valves. Reduces fuel consumption and toxic exhaust gases.

Application: Add to the fuel tank before filling at ratio 1:300 (200ml per 60 litres of fuel).
