

## O.E.M. for BMW Mini 7719

Universal bi-synthetic (PAO + esters) premium engine oil for modern diesel engines of BMW and MINI cars with and without a turbocharger.

Product properties:

- A unique bi-synthetic (PAO + esters) base with an expanded range of viscosity and temperature properties ensures effective engine operation in all operating modes: during cold start, in urban mode, offroad, as well as at increased load and high ambient temperatures;
- Excellent washing and dispersing properties and the highest thermal-oxidative stability effectively prevent all types of deposits and keep engine parts and turbochargers clean throughout the entire interval between oil replacements;
- A highly effective additive package guarantees a reliable cold start in the most severe conditions, significantly reducing engine startup wear;
- The exceptional durability of the oil film generated by the ester components contributes to the excellent anti-wear and anti-friction properties, considerably increasing engine life;
- Suits engines with extended oil change intervals (Long Life up to 30,000 km) and conventional engines;
- High thermal-oxidative stability effectively resists ageing;
- Compatible with all exhaust gas aftertreatment systems, including DPF, TWC, EGR and SCR due to the Mid SAPS technology;
- Can be used in BMW gasoline engines with manufacturer's approval.

Designed for diesel engines of cars, light SUVs, vans and light trucks of BMW with additional requirements for engine oils according to BMW LL-04 specification and earlier ones or where API SN / CF and ACEA C3 performance level is required.
